THIS FORTY-SECOND NUMBER OF GEER'S HARTFORD CITY DIRECTORY, has been rearranged and classified so far as possible under appropriate headings.

The changes annually taking place in cities are almost incredible. On pages 25—164 are 16,584 names, of which we have added this year 3,540 new names, and erased 3,482 names and have noted 4,394 removals and alterations—making 11,516 changes from last year's Directory, in the 140 pages of names—thus leaving only 5,010 names in this year's Directory as they were in that of the last year; and the changes in corporations and societies are equally astonishing; showing that a last year's Directory will mislead in more than two-thirds of its directions—changes having been made in more than two-thirds of the names.

In our Business Directory, pages 217—248, we have added the names of 518 new firms or individuals beginning business for themselves, and erased from our last year's Business Directory 478 names; showing a net business increase of 49 firms during the past year; we have also noted 659 removals and changes from our last year's Business Directory; thus showing 1,655 changes in the business firms in this city during the past twelve months—nearly two-thirds of the firms having changed during the past year.

There have been added 13 new corporations and 7 erased; and 28 new societies added and 7 erased.

On pages 10 and 11 will be found an Index to the business of the several business houses advertising herein.

Examine our Table of Contents on pages 12—14 for full directions as to the vast amount of information contained in this work.

Our Guide to the Location of Streets and Avenues on pages 17—24 has been revised to date, and has many original, useful features. The Map has the Wards all numbered and colored; also circles drawn one-half mile apart, having the Union Railroad Station as their center.

Next comes 140 pages of Names of Residents of Hartford; pages 25—164.

Do not fail to study pages 165—216 of Advertisements and those that are on the cover, as the same represents about 100 of the most respectable business firms in this city.

The new Business Directory will be found on pages 217—248.

Pages 249—251 have world-wide information.

Useful information about the present Congress, United States offices, Courts, &c., on pages 252—255.

All information desirable about the present Connecticut Capitol edifice and all the previous ones, with engravings, can be found on pages 256—259.

State Offices, Judges, Terms of Court, Offices of State Institutions, &c., on pages 260—265.

Hartford County Officers, &c., page 267.

Town of Hartford officers and Statistics are fully reported on pages 268—270.

Boundaries of Town, School and Voting Districts and City Wards, on pages 271—273.

Historical Sketch of Hartford has been chronologically re-arranged on pages 274—277. On the latter page a table of Taxes shows that the same have been annually decreasing from 22 mills in 1872 to 15 mills at the present payment.

Officers of the City of Hartford, in all their respective stations, with full information as to Common Council Officers, Water Works, Fire Department, Police, &c. on pages 274—288.

Engravings of the several Church Edifices in this City, with descriptions, and list of Officers to each, on pages 289—301.

Full information concerning all the Public Schools, on pages 302, 303.

Officers of the numerous Corporations and Societies of Hartford on pages 303—320.

Necrology of Hartford from June 1, 1878 to June 1, 1879, on pages 321, 322.

A new Table of Railroad Stations, Villages and Precincts, in this State with Towns and Counties where located on pages 323—326.

On page 327 is a new Table of Railroad Distances and Fares from Hartford.

Our Post Office information on pages 328—331 has been made as perfect as possible up to July 12th, inst.—a new feature thereof is on page 328 where we have added to the List and Location of Mail Letter Boxes, the hours at which letters are taken from the same by the letter carriers; also, table of the name of every Post Office in this State, with the time of mails closing; also the new postage rates.

Examine this TABLE of the number of names contained in each issue of this *Directory*, showing a gain each year:—

YEAR.	NAMES.	GAIN	YEAR.	NAMES.	GAIN	YEAR.	NAMES.	GAIN

1851,	5,361,	398	1865,	9,382,	28	1879,	16,584,	58

Contrasting this *Directory* of to-day with the first one issued in 1838, the growth of Hartford will be realized. Then the previous census made the population of Hartford 6,909—to-day it is 50,800. By the 1870 census of Hartford there was 3 1-16 population for every name which was that year in the *Directory*; multiplying the 16,584 names of this year thereby, we have 50,800 population.

To show the completeness and thoroughness of our information down to the time of printing, we give only a few illustrations, viz:—On pages 15 and 16 will be found list of officers of several corporations chosen in July, inst.

On page 35 we note the change that occurred in firm of B. Bliss & Co. July 7th, inst.

On page 125 we note the decease, July 4th inst., of a prominent business man of this city—William C. Pettibone—whose name has been in this *Directory* 42 years.

On page 135 we erased the business of Wm. R. Rowley, who sold out July 7th inst., and inserted his removal to 18 Morris st.

On page 152 we inserted the name of Wm. J. Tolhurst, grocer, 53 Maple, who began business there July 7th, inst.

On page 164 we note the decease of Alanson Work, July 6th inst., who was an old, honored resident of this city.

On page 249 information is brought down to the latest change in Governments of the World, in the change of Rulers in Afghanistan to Yakoob Khan.

On page 254 is the July 1st inst. statement of the United States finances.

HARTFORD, July 12th, 1879.

POPULATION OF HARTFORD.

In 1756, including Manchester, E. & W. Hartford,	3,027
" 1790, including West Hartford,	4,090
" 1800, " "	5,347
" 1810, " "	6,003
" 1820, " "	6,909
" 1830, " "	9,783
" 1840, " "	12,794
" 1850, " "	17,066
" 1855, of Hartford with West Hartford set off,	24,021
" 1860, " " " " " " " " " " " "	29,207
" 1870, " " " " " " " " " " " "	37,825
" 1879, " " " " " " " " " " " "	50,800

The population of 1879 is computed as follows: The *Directory* of 1870 contained 12,345 names. The United States census of that year gave Hartford a population 3 1-16 times that number. By applying the same ratio to the present *Directory* we have now a population of 50,800.

ELIHU GEER'S

GUIDE TO THE LOCATION AND NUMBERS

OF

STREETS AND AVENUES;

TO WHICH IS ADDED THE

WARD LOCATION OF EACH STREET.

ALSO, LETTER INDICES TO STREETS HAVING

WATER PIPES, GAS PIPES, and SEWERS; Also the Streets that have been MACADAMIZED, CURBED, &c.,
IN THE CITY OF HARTFORD.

Entered according to Act of Congress in the year 1874, by ELIHU GEER, in the office of the Librarian of Congress, at Washington, D. C.

The figures 1. 2. 3. 4. 5. 6. 7. 8. on the right of the names of each street indicate the wards in which the same are located,—the ward boundaries generally run in the center of streets.

The letter G indicates that GAS PIPES are laid in such streets, in whole or in part.

The letter M indicates that said street is either wholly or partly MACADAMIZED, CURBED, and with STONE GUTTERS.

The letter W indicates that CITY WATER PIPES are laid in such streets, in whole or in part.

The letter S indicates that said street is SEWERED, in whole or in part.

This Guide indicates at a glance the proximate locality of any required number on any street; for example, if you desire to know about where No. 800 Asylum street is located, this guide shows you that, being an even number, it will be found on the north side, and about mid-way between Sumner and Huntington streets.

The streets running north and south are numbered from the south excepting Wethersfield and Maple avenues numbered from the north; those running east and west are numbered from Main street, or from the end of the street pointing thereto, excepting North st. Odd numbers on the SOUTH and WEST sides, uniformly.

The names of all streets running north and south (except Main, Broad and Laurel), change at Park river, and all east and west at crossing Main street.

Gillett street has been re-numbered this year and the new numbering adopted in this year's Directory.

EXPLANATIONS.

THE business location of individuals engaged in business for themselves, is first mentioned in connection with their names, and then their place of residence.

When two numbers are given in connection with one name, and only one street mentioned, the number first given is the place of business, and the second the residence, and both in the same street.

The letter h. signifies house; b. boards; l. lodges or rooms at; st. street; av. avenue; r. rear; u. upper tenement; pl. place; ct. court; rd. road; &c.

We have omitted at the end of each line, av. pl. and ct. except in cases where streets and avenues have the same name. Therefore where the residences of individuals are put down as at New Britain, Farmington, Maple, etc., the word avenue is understood to follow—being left off from lack of room on most of the lines. For the same reason abbreviations of names of streets, etc., are made as follows:—

WILLIAM ROGERS,

MANUFACTURER OF FINE

**ELECTROPLATED GOODS,
Spoons, Forks, Knives, Tea Sets, Castors, &c.,
OF THE BEST QUALITY.**

Office, 551 MAIN STREET.**TO WHOM IT MAY CONCERN.**

It having been extensively circulated (with Asa H. Rogers' picture attached) that he founded the so-called Rogers Cutlery Co., I wish to deny that Asa H. Rogers ever had any interest in the Rogers Cutlery Co. (See Town records.) WM. ROGERS,
Administrator on the estate of the late A. H. Rogers.

Attention is called to the following advertisement inserted in the DAILY COURANT, March, 1868, which was never modified or recalled:—

To Whom it May Concern.—No party has the right to use the individual name of William Rogers, or the names of Wm. Rogers & Son, unless by our written consent in each and every case, or to sign any document for either of them, and any statement either verbal or written has the value simply of the person from whom it emanates and should be signed and guaranteed by such person, and we repudiate any action in any matter, concerning our affairs, unless signed by the subscribers. (Signed),

WM. ROGERS,
WM. ROGERS, JR.

March 7, 1868.

Many enquires having been addressed to me, if I was connected with the *joint stock company*, called the Wm. Rogers Mfg. Co., corner of Grove and Front streets, in consequence of a statement in the daily papers that F. William Rogers was secretary of said Co. I will state that I am in no way connected with it, neither was father ever connected with this Joint Stock Co. F. Wilson Rogers has recently become connected with it. Either by accident or design, several advertisements have appeared lately, signed "F. William Rogers."

F. William Rogers is an illegal use of my name, (if used by design), liable to make confusion, and seriously interfere with my rights—

Therefore, I take this method of notifying all persons against infringing my rights.

IMPORTANT TO PRINTERS!

New Composition for Inking Rollers.

Protected by Letters Patent granted by the United States and Great Britain.

MERITS OF THE COMPOSITION.

All printers fully realize the importance of having their Inking Rollers in proper condition to do good work, and the constantly changing condition of the old glue and molasses rollers, has long called for something better, whereby the perplexity, time, and expense may be saved, and, at the same time, better work be secured, without that close attention usually required to keep rollers in good order. We call attention to the following as some of the principal advantages of our Composition:—It *never* loses its *suction*. It *never* *shrinks*. It *always* remains *moist*. It *never* *skins* over on the face. It *never* *cracks* on the face. It does not become *hard* by cold weather; consequently, the same roller works equally well in winter or summer. It can be *re-cast*. Our rollers are tougher than any others in use. Time does not affect them; they are not injured by *age* or *climate*. They will not mould or mildew. They are *cheaper* than the ordinary rollers in use, although first cost may be more. As they do not require *washing* daily, like other rollers, there is a saving of *ink*, *time*, and *materials* used in *washing*. They are good proof rollers, as ink does not dry on them.

☞ We send, with Composition Directions for Casting, Re-Casting, and for Using. ☞

☞ THE TRADE WILL PLEASE TAKE NOTICE that our patents give the exclusive use of GLUE, AND GLYCERINE, WITH OR WITHOUT SACCHARINE MATTER, FOR PRINTING PURPOSES, and all unauthorized manufacture or uses of glycerine and glue for printing purposes is an infringement thereof. Many printers may be drawn into this infringement unawares, as some of the manufacturers of glycerine are advertising "Glycerine for Printers' Rollers." The patents for the use of glycerine were fully sustained in the Circuit Court of the United States, Francis & Loutrel, vs. Borchardt & Bergman, July, 1866. Any person requiring any information on this subject may obtain it by addressing

FRANCIS & LOUTREL,

Patentees and Manufacturers,

CYRUS H. LOUTREL.

45 Maiden Lane,
NEW YORK.

☞ THE HARTFORD CITY DIRECTORY has been printed with Rollers made of the above Composition for fourteen years past, and used exclusively in said office on all other work. Some of the rollers used in printing the present edition of this Directory were cast three years ago.

We are prepared to make all kinds of Boiler work with great facility, and at as low rates as any shop in the country, for the same class of work, using *exclusively* for our Boilers the CELEBRATED PLATE OF THE BAY STATE IRON CO., of Boston, so favorably known throughout New England for its great tensile strength and uniformity of production.

In all Boiler work we aim to use nothing but *first-class materials* and make *first-class work* in all respects. All edges of Boiler plates are planed by a machine made expressly for that purpose, making a better, safer, and much more perfect seam than can be made by hand chipping. All our Boilers are tested by the HARTFORD STEAM BOILER INSPECTION AND INSURANCE CO., who give with their certificate of inspection a policy of insurance for four hundred dollars, for one year. Warranting everything to be as we represent, we respectfully solicit your orders for anything in our line.

**Hartford Courant,**

(DAILY AND WEEKLY.)

THE COURANT is the oldest newspaper of prominence in the United States, and with less than half-a-dozen exceptions, the oldest print in the English language. It was founded in October, 1764, and has been published uninterruptedly, under the same title, ever since.

**THE DAILY COURANT,**

ISSUED EVERY MORNING EXCEPT SUNDAYS,

IS THE LARGEST DAILY IN NEW ENGLAND,

And has the largest Advertising patronage. No effort or expense is spared to give it the character of a first-class journal, at

**\$8.00 A YEAR,**

And has a circulation second to but one provincial Eastern daily.

**THE CONNECTICUT COURANT**

Is a very large weekly, carefully made up of the most valuable matter appearing in the daily, and accompanied every other week by an eight page literary supplement.

Its circulation extends to all parts of the country, making it one of the best Advertising mediums in New England. Its terms are

**\$1.50 A YEAR.**

POSTAGE FREE, on both Daily and Weekly, to any part of the Union.

COMMUTATION TICKETS for the Summer season or for the year, can be had of A. W. WARNER, Secretary, at the office of the Company, or of WM. H. GOODSPEED. During March and November the Boats will leave Hartford one hour earlier. Passengers by the “Silver Star,” connecting at Saybrook, to and from New York, will not be charged extra. During the Winter season the New York Boats connect with the Valley Railroad at Saybrook, delivering freight very early and with great regularity, and being thoroughly warmed, and in every way adapted to the service, passengers find this a very cheap and pleasant route.

The sea going Steamer “GRANITE STATE” can be chartered for Excursions on application at the office of the Company.

A specialty this season will be made of EXCURSIONS to CONEY ISLAND and LONG BRANCH, besides the usual Excursions to BLOCK ISLAND, the VINEYARD, NANTUCKET, etc. For full particulars see Daily Papers, Posters, etc.

## ASSOCIATE DENTISTS,

405 MAIN STREET,  Miller's Building, opp. Cheney's,  
HARTFORD, CONN.

It is remarkable that, while the staples of life have recently undergone reductions of fully one-half, professional services remain at nearly old prices. We see no good reason for this, and thus are sincere in offering our services at about half the price usually charged for first class work. We understand ourselves, and know—as everybody knows—we have margin enough left, if we can but get sufficient practice. Here too we have no concern, if we can but get the ATTENTION of the many who would gladly avail themselves of our offer. Thus a little inquiry will show any one that, our prices for artificial teeth, for instance, happens to be just one-half those charged by some dentists of the city; while our prices for filling teeth average nearly as low. The only question then becomes, does our ability entitle us to rank with the dentists whose prices we thus cut in two, or should we be classed with the ordinary "cheap dentist," whose prices we really charge? If any one concludes, on investigation, that we belong to the second class, then we frankly advise him to go elsewhere, even at ten times the cost, if need be. For, however desirable cheapness may be, poor dentistry—especially in filling teeth—can never be cheap at any price. But, if we stand the test of inquiry, the folly of employing incompetent dentist at our prices, or other competent dentists at twice our prices, is evident. We sympathize with the public in the difficulty of determining between dentists, especially as the most inferior may have the most noisy reputation—so easy is it for the mere extractors of teeth to obtain reputations. We can but suggest that, it is more in harmony with progress for the public to judge a dentist rather by his ability to save teeth than sacrifice them. We certainly extract teeth, when necessary, but we trust we are a pace ahead of barbaric ages, when to extract was all that was known.

We will not run further risk of being considered pretentious, by enumerating the claims of our different specialists, in their respective departments. We simply call attention to the fact that, of the half dozen dental graduates in the entire city, two of them are of our number; and, in contrast with a patient falling into the hands of the incompetent for advice, we call attention to our Consulting Dentist, who has had twenty years of most extended observation, commencing as a dental graduate. We charge nothing for consultation, yet our advice often proves of the greatest benefit to patients who had previously decided upon the very worst course for them to pursue.

## Large Cities in the World.

THE FOLLOWING TABLE gives the name, country and population of all cities of Europe containing 50,000 inhabitants, and all in the world whose population is over 100,000—except cities in the United States, given on page 255—besides other places of note, of less population; compiled from latest census and authorities, for GEER'S HARTFORD CITY DIRECTORY for 1879. The cities of the United States are from 1870 census.

STATISTICAL TABLES show that there are in the whole world about one hundred and fifty cities with 100,000 inhabitants; nine with over 1,000,000; twelve with from 500,000 to 1,000,000; twenty with from 300,000 to 400,000; thirty-three with from 200,000 to 300,000; and ninety with from 100,000 to 200,000. The aggregate of the population of these large cities comprises 50,000,000 of inhabitants, that is to say about the twenty-eighth part of the entire population of the globe.

## State Capitol, Hartford.

*Approached from Asylum, Ford, Pearl, Jewell, Trumbull, Mulberry, Wells, Elm and Trinity sts., and Capitol av.*

THIS EDIFICE is on BUSHNELL PARK, in the City of Hartford, and is unrivaled in location, being in full view of travelers on the cars. The style of the building is modern secular Gothic. The general ground plan of the building is that of a parallelogram. It has four fronts, nearly corresponding with the four cardinal points of the compass. Its extreme length is 295 feet 8 inches; depth of center part 189 feet 4 inches; depth of wings 111 feet 8 inches; depth of intermediate parts 102 feet 8 inches; total height from ground line to top of crowning figure 256 feet 6 inches; level of ground line around the building is 84.7 feet above mean low water at Saybrook; 3 feet fall in river.

Material, white marble. The building will be completed in 1879, at an expense of \$2,500,000 and the site \$600,000 more, which with \$500,000 in cash Hartford donated, makes the entire cost \$3,100,000;—leaving the sum of \$2,000,000 to be paid by the State. As Hartford and Hartford corporations paid \$700,407.44 into the State Treasury in 1875, of the \$1,761,533.53 entire revenue of that year, it will be seen that Hartford's proportion of the \$2,000,000 is \$795,160, which added to the donation of \$1,100,000 makes the sum of \$1,895,160—nearly two-thirds of the entire cost of this Capitol will have been paid by Hartford. The 1878 Legislature appropriated an additional \$10,000 and the 1879 Legislature an additional \$25,000 to be expended in grading the grounds around this edifice.

The central and commanding feature of the building is the dome, which is richly adorned with arcades, columns, galleries, etc. It is constructed of marble like the rest of the building. The dome, in plan, is a duodecagon (twelve-sided), and on each terminal, at angles, is placed a female figure. The figure for Connecticut surmounts the cupola, and holds two wreaths, one of immortelles and one of oak leaves. The Representatives hall, which is the central building of the south front, is lighted on three sides, and supported on an arcade of polished granite columns with carved granite caps. The building has four fronts. The commissioners spent about \$400,000 annually. The frame work of the slated roof is of iron. The building is fire-proof.

Four steam boilers of fifty horse power each are in a vault outside of the building, and are working satisfactorily in every respect. Much attention has been given to properly warming this spacious building, and from results already attained, efforts in this respect are

entirely successful. Thirty miles in length of steam, water and gas pipes have been laid as the building progressed. There is a proper system of ventilation.

The statues of Sherman and Trumbull, cut in fine statuary marble, seven feet in height, also a medallion of Bushnell, are placed on each side of the center tympanum over the east entrance, upon which a likeness of the historic Charter Oak Tree is cut. Places have been left for many marble statues, busts and tympana.

### ARRANGEMENT OF ROOMS.

As the interior of the building has been arranged by the commissioners, the rooms of the state officers are on the first floor, the executive and legislative rooms on the second or main floor, the legislative committee rooms on the third floor, above the senate and house floors, and the upper floor is used for store-rooms. Except the floors of the legislative halls and offices, which are of hard pine, the only woods used in the building for finishing, fittings and furniture, are oak, black walnut and ash. There is no veneer or varnish used in the entire building. The woods are left in their natural state, except that the pores are filled with some preparation and rubbed down with hard oil finish, giving a smooth surface without a shining polish.

### THE SENATE CHAMBER.

Has a floor 50 by 40 feet with a height from floor to ceiling of 37 feet. It has three windows on the east front of the building admitting direct light, and the central panel in the ceiling is also a skylight. The desks are placed in three lines of seven each, one facing the president's desk and the others on the sides at right angles, leaving a large rectangular area in the center and ample passage ways around the outside. The rows of desks do not meet at the corners, leaving passage ways toward the angles of the room. The entire chamber is finished in oak wherever wood is used. The carpet has a small pattern agreeable to the eye and in harmony with the walls. The gas fixtures, also, for these halls and the supreme court rooms, which are all of similar pattern, and are of plain, solid, finished brass, with no attempted ornamentation by oxidization or imitation of bronze. Indeed these gas fixtures are a type of everything throughout the entire building—solid, substantial, honest, and durable. The desks and chairs of the senate are oak. Except the difference of material they are nearly alike. The top levels or backs of the desks have a covered recess for the reception of pens,

ink, and pencils, and under the desks—which is also a receptacle for papers, documents, hats, etc. The chairs have cane seats and backs covered with crimson leather, the back upholstery bearing in emboss work the state coat of arms. The chairs move on hard rubber casters which are entirely noiseless.

### THE REPRESENTATIVE'S HALL.

The hall of the representatives has a floor area 84 by 56 feet and a height of 48 feet. It is situated on the southern projection of the building and is lighted by windows on the east, south and west, the gallery for spectators being on the north side, on which side is the speaker's desk. The length of the representatives hall is from east to west, and the floor is a series of platforms four feet six inches wide with risers, or steps, of seven inches. On these the members' desks and seats are arranged in amphitheatrical form, with radial aisles having the space around the speaker's desk for the center. There is a central aisle, and two running to the corners of the desk with a shorter aisle in the center of each section of seats, the largest groups or sections having seven seats and there being only two of this number. By this arrangement no member in reaching his seat is obliged to pass by more than two of his fellow members. The woodwork and furniture of this hall is of black walnut and are similar to those in the senate chamber except that they are upholstered in maroon leather. The gallery has seats for about 250 persons.

### THE GOVERNOR'S ROOMS.

The governor's rooms consist of a private office and audience room in the southwest corner on the mezzanine floor, lighted by windows on the south and west. They are finished in oak and furnished with adjoining safety vault, etc.

### LIEUTENANT-GOVERNOR'S ROOMS.

The corner rooms north and south of the senate chamber at the east end of the building are for the lieutenant-governor and speaker of the house. They are connected by a doorway.

### THE COMMITTEE ROOMS.

Nineteen in all, are on the second and third floors, in close vicinity to the halls of the assembly, and are amply sufficient in number for all the business of a session. In all there are sixty rooms for the use of the state officers, committees, and the convenience of them and members of the legislature.

### STATE DEPARTMENT ROOMS.

On first floor are rooms for the treasurer, comptroller, secretary of state, school fund commissioner, insurance commissioner, adjutant general, paymaster general.

### THE SUPREME COURT ROOM,

Is on the second floor in the west portion of the building, and is lighted by six windows on the west side arranged in two rows. It is 50 by 31 feet on the floor, and has a height of 35 feet from floor to ceiling. It is finished in oak.

### THE STATE LIBRARY ROOM,

Is on this floor and has a superficial area of 85 by 55 feet with a height same as that of the supreme court room—35 feet. It is situated on the north center, its north windows overlooking the northern entrance.

### A CLOCK

Of ordinary construction is located on the fourth floor, with 17 dials connected by the electric system in the several rooms.

The furnishing of the several rooms has cost \$63,000.

### ELEVATOR AND FLOORS.

A steam elevator, six by eight feet, is located near the centre of the building. The floors throughout the capitol are built with brick arches turned against iron beams; and in the construction of the roof, iron has been extensively used, so that the building is considered thoroughly fire-proof.

### THE FINISH.

The wood finish presents a pleasing variety of oak, black walnut and ash, the details being in conformity with the general work; the doors opening from the corridors are constructed with fan lights, and the door furniture, which is of bronze, shows special designs, prominent

among which is the escutcheon, bearing on the outer face the coat-of-arms of the state, and on the inner face the city coat-of-arms. Substantial vaults with iron and steel doors, combination locks, and all the most improved guards for safety are provided for the treasurer, school fund commissioner, and other officers.

The Connecticut Legislature met in the new Capitol, March 26th, 1878, for one day. The State Offices were moved therein October 26, 1878.

The Legislature or General Assembly began its regular sessions in this new edifice, on Wednesday, January 8th, 1879.

### OCCUPANCY OF THE ROOMS.

All even numbered rooms are on the North side of the building—all the odd numbered on the South side. The rooms numbered 1 to 10 on the first floor; 21 to 30 on the second floor; and 41 to 50 on the third floor, are on the East end. Nos. 11 to 20 on first floor; 31 to 40 on second floor; and 51 to 60 on third floor, the rooms are on the West end of the edifice.

## ILLUSTRATED HISTORY

OF THE

## Old State Houses in Connecticut.

THE first meetings of the general assembly were held in this city in the old meeting house in an up stairs room called the Court Chamber. The meeting house stood on the east end of the green, which is now City Hall square.

1719 STATE HOUSE IN HARTFORD.

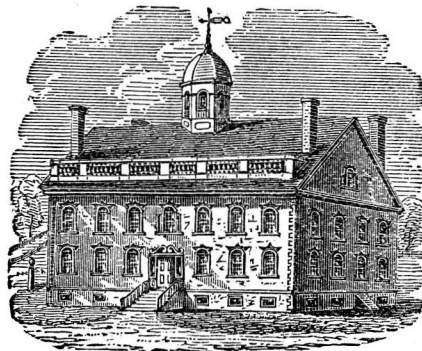

THIS engraving is a representation of the first building erected by the state for the special use of the legislature. It was a wooden structure, and stood immediately in front of the present City Hall in this city, the front part of it standing on what is now the sidewalk on Main street, in front of City Hall square. It was built in 1719, and was probably occupied in May, 1720. Its erection in Hartford located Yale college at New Haven for the colony appropriations for the "collegiate school at New Haven" and the Hartford court house log-rolled each other through. The ungranted lands of the colony were sold and £1,550 raised thereby. Yale was voted £500 and Hartford £650. This was 45 years before there was any State House in New Haven.

There were two main entrances; one on Main street, the other on the south side of the building, on Central row. The upper part of this State House was supported on wooden pillars, and the first floor was an open hall or lobby. The representatives' hall was on the north side, and the council (senate) chamber on the south side. There were no public offices in the building. But there was a small room between the two legislative halls lighted by the window over the Main street entrance, used for a private consultation room. The building was seventy feet long and thirty feet in width, and twenty-four feet from floor to ceiling. The garret, under the roof, was used for storing the arms of the militia. The building committee received from the committee on the sale of public lands, £500, which was paid for the building; the county of Hartford paid £250 for furnishing the building. To meet the expense on the part of the county, the Hartford county court, in Feb. 1719, laid a tax of half a penny on the pound on all the polls and rateable estate within the county.

This building remained as our picture shows it, till 1783. On the 20th of April of that year, Governor Jonathan Trumbull received the news of the provisional treaty of peace between Great Britain and the United States—the end of the Revolutionary war. On a Wednesday following, there was a grand military parade in front of the Capitol, and the principal citizens

led in a grand jubilee. In the evening the principal buildings, public and private, were illuminated, closing with fire-works. The State House was lighted with candles, and near midnight the cupola was discovered to be on fire. It was thought the building would be destroyed, but under the lead of Captain Wylls, a grand effort was made and the flames were extinguished after the cupola and a good part of the roof were destroyed. Many of the citizens of Hartford contributed towards repairing the building, and some of the farmers in adjoining towns contributed timber. The Hartford county court ordered that the repairs should be completed in season for the meeting of the legislature in May, this order probably carrying the payment of such expense as might be incurred above the amount contributed by individuals. The work was done, but the cupola was not rebuilt; and the expense evidently was not great.

When the 1796 State House was completed, this old wooden structure was removed to Church street, on the lot next adjoining Christ church. It was fitted up and used for a private residence and boarding house for many years; then a Mr. Patten kept a private school in it; and about 1822, John Newland Maffitt held some rousing revival Methodist meetings upon the floor where the patriots of the Revolutionary period had legislated for the colony and state of Connecticut; then it was used for different purposes for many years. After several years such service it was torn down.

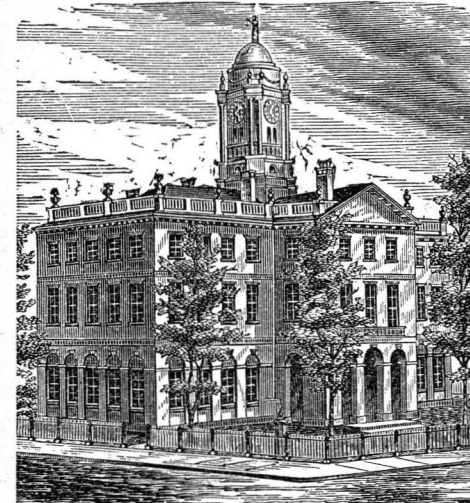

1765 STATE HOUSE IN NEW HAVEN.

THE next capitol built by the state, was the brick structure, erected on the Green, fronting Temple street, in New Haven. It was ordered to be built in 1763. It stood fronting Temple street, a few rods north of Trinity church. The steps projected into the street, and had a wrought iron railing which was much admired. The first floor in early times was for balls, and as a dining hall on great occasions. Early in the present century the house was enlarged in the rear to near double its original size; the gambrel roof was removed, and a cupola placed upon the central part of it, which contained a bell. The senate, or upper house, as it was then called, occupied the south room of the second story, and the members of the lower house the north

room, in which was a narrow gallery for spectators, the court room and jury room being on the first floor. The house was well elevated, having a basement for the storage of wood, etc. At the left of our picture of the ancient State House at New Haven appears a post, and this was a "whipping post," actually used for that purpose in the administration of justice in the "City of Elms."

This House was torn down in 1830, when the present State House in New Haven was completed, and the proceeds that were received from the materials were applied to the expense of the new State House.

1796 STATE HOUSE IN HARTFORD.

THE legislature of 1792 appointed a committee to build a "large, convenient State House" of brick, the state agreeing to pay £1,500 on condition the citizens of the town, county and city of Hartford raise and paid over the same amount to the commissioners by May 1st, 1793. This money was raised in sums varying from \$25 to \$500.

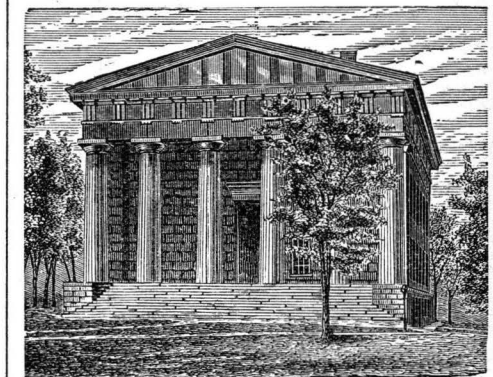

The last old State House, (now City Hall), in Hartford, as above, was ordered to be built in 1792, was completed in 1795, and occupied in 1796. This building cost \$52,480, of which the city of Hartford gave \$3,500, and the county \$1,500. It is a building of considerable historical interest. The famous Hartford Convention assembled in it on the 15th of December, 1814; and the Constitutional Convention of 1818 met within its walls and adopted our present state constitution. The distinguished citizen of France and friend of our republic in its struggles for independence, General Lafayette, was received at this State House with distinguished military honors, in 1824. Five Presidents of the United States have visited its chambers: Jackson, Monroe, Polk, Johnson and Grant, and many other distinguished citizens of this and other countries, have been received with state courtesies, within its walls.

At the May session of 1796, the treasurer and comptroller were authorized to take possession of the offices provided for them in the new State House, as soon as the same should be completed and ready for occupancy, and to remove to them the books, files and documents belonging to their respective departments.

The present cupola and balustrade were not built at the time of the construction of the building. The balustrade was put on in 1815, and the cupola was built in 1822-3. Its model was taken from the old City Hall of New York; and access to it was by an iron spiral staircase, which was a wonder and a curiosity in those days, many builders coming from a dis-

tance to see it. This spiral staircase was removed in 1835, in order to make room for the enlargement of the secretary's office; the stairs being placed at the east end of the building. In 1854 the large corridor or lobby was cut off at the east side and the state library was there established.

In consideration of the money paid by the county of Hartford in aid of the construction of this building, it has had the privilege of the superior court room in the north wing of the building, which it now occupies. On the completion of the new State House, this building went into possession of city of Hartford, Oct. 26, 1878.

1830 STATE HOUSE IN NEW HAVEN.

THIS State House, at New Haven, as represented above, was ordered to be built in 1827, and was completed in 1830. It is of brick and stucco, of the Ionic or Greek order and has been pronounced one of the best imitations of an ancient model ever made. In 1827, the legislature appropriated \$20,000, to be paid in installments of one-third of that sum yearly for three years; provided the county and city of New Haven should raise the sum of \$10,000 in aid of the building. The New Haven county courts of law and city courts were held in the building in consideration of the money paid by city and county. In 1829, the legislature appropriated \$9,000 to pay for several improvements, including marble steps to the main entrances. In 1830, another appropriation of \$2,500 was made to complete the structure. In 1831, a resolution was passed authorizing the treasurer, secretary and comptroller to allow and pay to the building committee a reasonable compensation for their services. In an old ledger of the comptroller, on the 12th of October, 1832, appears an account of an order on the treasurer, in the list of payments for this State House, for \$1,030.25, to pay the building committee for their services, and another of \$621.50 in favor of the architect, making the total cost \$43,151.75.

The last session of the General Assembly was held there in 1874, when the building was passed over to the city of New Haven. Latterly it has been turned over to the Connecticut Museum of Industrial Art.

A few comparisons will perhaps, better than simple figures, show the growth of this State and its demand in the way of space for its assembly. The whole building that stood in Hartford until 1796 was about one-fifth the size of that which was thereupon occupied and is just abandoned. The State House of 1796 is about one-twentieth the size of the new 1878 building on Bushnell Park. Therefore the old 1720 State House had about one-hundredth the space of the new one of to-day. The whole first State House was about two-thirds the size of the new senate chamber, or one-fifth the size of the new representatives' hall.

FOR 1878 STATE HOUSE OR CAPITOL  
AT HARTFORD, see pages 256, 257.

## STATE TAX, AND AMOUNT PAID BY HARTFORD.

One and one-half mills on the dollar of Grand List, which is included in the tax levied by each town, and paid by the towns direct to the State Treasury.

From the Treasurer's Report, for the fiscal year ending Dec. 1, 1877, the total revenue of Connecticut was \$2,316,481.11, and the taxes derived altogether, both direct and special, from Hartford and the corporations located therein were:—

|                                                  |              |
|--------------------------------------------------|--------------|
| State tax,.....                                  | \$ 81,758.09 |
| Life Insurance Companies,.....                   | 407,652.14   |
| Railroads,.....                                  | 100,233.63   |
| Fire Insurance Companies, local ag'ts, &c.,..... | 12,644.78    |
| Savings Banks,.....                              | 73,056.01    |
| Non-resident stocks,.....                        | 84,439.93    |

Total,.....\$759,784.58

The railroad tax included in the above takes in steam and street railways, whose offices are located in Hartford, and Hartford shares N. Y., N. H. and H. railroad. The whole amount of revenue received by this State during the past year was \$2,316,481.11. From this it will be seen that Hartford continues to pay about one-third of the whole amount of monies received by the State of Connecticut.

BEGINNING at the point of intersection of the east line of the city and the center line of Kilbourn street, and running thence westerly on said center line to its intersection with the center line of Front street, thence northerly through the center of Front street to its intersection with Temple street—thence westerly through the center of Temple street to its intersection with Main street—thence southerly through the center of Main street to its intersection with the center line of Park river—thence easterly on the center line of said river to the eastern boundary line of the city, and thence northerly on said eastern boundary line to the place of beginning.

**SIXTH WARD.**—VOTING PLACE, 66 MORGAN, COR. FRONT

BEGINNING at the point of intersection of the center line of Kilbourn street and the eastern boundary line of the city, and running thence northerly on said boundary line to its intersection with the northern boundary line of the city—thence westerly on said northern boundary line to its intersection with the center line of the railroad of the H. & N. H. Railroad Company—thence south-westerly on the center line of said railroad to its intersection with the center of Windsor street—thence southerly through the center of Windsor street to its intersection with Main street—thence southerly through the center of Main street to Temple street—thence easterly through the center of Temple street to Front street—thence southerly through the center of Front street to Kilbourn street—thence easterly through the center of Kilbourn street to the place of beginning.

**SEVENTH WARD.**—VOTING PLACE, 5 PLEASANT ST.

BEGINNING at the point of intersection of Main and Windsor streets, and running thence northwesterly through the center of Main street to Albany avenue; thence westerly through the center of Albany avenue and Albany road, so called, to the western boundary line of said city; thence northerly on said western boundary line to the northern boundary line of said city; thence easterly on said northern boundary line to the center line of the railroad of the Hartford and New Haven railroad company; thence southerly on the center line of said railroad to the center line of Windsor street; thence southerly on the center line of Windsor street to the place of beginning.

**EIGHTH WARD.**—VOTING PLACE, 44 WARD ST.

BEGINNING at a point on the southern line of said city at its intersection with the center line of Maple avenue, and running thence northerly, through the center of said Maple avenue to its intersection with Webster street; thence through the center of Webster street to its intersection with Washington street; thence through the center of Washington street to its intersection with Park street; thence westerly through the center of Park street, and the road in continuation of it to the western boundary line of the city; thence southerly along said boundary line to the southern boundary line of the city; thence easterly along said southern boundary line to place of beginning, shall constitute and be the eighth ward of said city of Hartford.

## City of Hartford,

Incorporated May 29th, 1784.

### HISTORICAL SKETCH.

HARTFORD was first settled in 1635, by emigrants from Newtown, now Cambridge, Mass., and from Dorchester and Watertown; many of whom had come originally from Braintree, in the county of Essex, England. The locality had been explored in 1634, and some huts had been erected, in what is now Wethersfield, where a few men passed the winter of 1634-5. The main body of emigrants, however, came across the country to Chicopee, in Springfield, and thence down the river, traveling by compass. The journey occupied about a fortnight; now only four hours!

Hartford is built on a strong clay soil, near the river it is a rich black mold. The city has 6,428 acres, or 10 square miles, and 4,137 acres outside of the city, or 6½ square miles. The *Town* of Hartford is 5½ miles long, by three and one-fourth broad. It is located on the west side of Connecticut river, at the head of steamboat navigation, and 50 miles from its mouth, in latitude 41 deg. 45 min. 59 sec., and longitude 72 deg. 40 min. 45 sec., also longitude 4 deg. 15 min. East from Washington. By the New York, New Haven and Hartford railroad it is 111 miles north-east from New York and 124 miles west by south-west from Boston, and 26 miles south of Springfield; by the New York and New England railroad it is 118 miles south-west of Boston, 90 miles west of Providence, 33 miles east of Waterbury, and which road is now (1879) being completed to the Hudson River and Fishkill; by the Connecticut Western railroad it is connected 110 miles east of Poughkeepsie and 126 miles from Albany; by the Connecticut Valley railroad it is 44 miles to Saybrook and Long Island Sound; by the Connecticut Central railroad it is connected with Springfield, Athol, etc. The Legislature of the State meets here every year on the first Wednesday after the first Monday in January. The city is divided by Park river, spanned by 10 bridges. The Town of Hartford contains 17 square miles—10,880 acres. Its **WATER LEVEL** is only about 3 feet above that of Long Island Sound 50 miles south of this city; between this city and Wells river, Vt., a distance of about 200 miles, the fall in the bed of the Connecticut river is 400 feet; the fall at Holyoke dam is about 30 feet; between Enfield and this city, a distance of 18 miles, some 25 feet.

The **DUTCH** had, in 1633, erected a fort which they named the House of Hope, on "Dutch Point," at the confluence of the Park and Connecticut rivers, within the present City of Hartford. But the Dutch were legislated out by the General Court of Connecticut, in 1654, and the new colony was ruled by English.

The first town organization admitted "inhabitants," and even temporary residents, only by vote of town meeting. The **OFFICERS** were "townsmen," who answered to the present selectmen, but with more extensive authority; a town court, constable, town clerk, crier, fence viewers, chimney viewers, and highway

surveyors; and a little after were added grand jurors and a jailor. There was a public market semi-weekly, and a public fair twice a year.

The **FIRST TOWN MEETING** was in 1635, the year of settlement, and the first General Court of Connecticut was held the next year, 1636.

Hartford originally contained all the **TERRITORY** east of Hartford, now known as East Hartford and Manchester, also the town of West Hartford. In 1784, East Hartford, including most of the town of Manchester, was set off from Hartford; Manchester subsequently being made a town in 1823; West Hartford was set off in the year 1854.

The present locality of Hartford was called by the Indians, Suckiaug.

The first settlers named it Newtown; but in 1636, it was formally named **HARTFORD**, after Hartford, now called Hertford, county town of Hertfordshire, England, and birth place of Rev. Samuel Stone.

Mr. Stone and William Goodwin received a **DEED OF THE LAND** of the new settlement in 1636, from Sunk-quassen or Sequassen, sachem of the Suckiaug tribe. This deed was lost, and the settlers repurchased the land of the Indians in 1670, taking a new deed for certainty's sake.

The **FIRST CHURCH** in Hartford came ready organized from Cambridge, with its pastor, teacher, and ruling elder, Hooker, Stone and Goodwin, and its first house of worship was erected in 1638, Mr. Hooker's barn having served instead, up to that time.

The first war was the **PEQUOT WAR, 1637**; for which Hartford contributed forty-two out of ninety men, including commander and chaplain; besides a large share of the provisions, &c., for said war.

The **FIRST FLOURING MILL**, date uncertain, was very early erected near the present park.

In 1638, Ludlow, Haynes, Wolcott, Hopkins and Hooker, set about forming a **WRITTEN CONSTITUTION** which was finished in 1639; the first ever formed in America, and which embodies the main points of all our subsequent State constitutions and of the Federal constitution; so that Hartford may claim to have been the model for our whole republic.

A **CLASSICAL SCHOOL** was in operation here as early as 1638; and in 1643, sixteen pounds a year were voted to the teacher. In 1657, Gov. Hopkins left about £1,000, part of which endowed the **HARTFORD GRAMMAR SCHOOL**, yet in existence as the classical department of the Hartford High School. And this is the oldest educational institution in these United States.

A **HOUSE OF CORRECTION** was in operation in 1640.

An **INN** was ordered by the General Court, and established in 1644, nearly opposite the Center church. It was from this inn that Capt. Wadsworth took the Charter, to conceal it from Andros, in 1687.

The **FIRST COLONY** emigrated from Hartford in 1645, and founded Farmington. Others succeeded; one founded Middletown in 1650; another founded Norwalk in the same year; and a third founded Hadley, in 1659. Hartford has sent out innumerable delegations, and single emigrants, ever since, to all parts of the world. By the U. S. census of 1870 there were 5,141 persons living in New York city who were born in Connecticut—a large portion of whom were born in Hartford.

In 1650, our **FIRST MISSION** was organized, by order of the General Court; which directed a teaching elder and an interpreter to go among the Indians twice a year to endeavor to convert them.

In 1650, also, our **FIRST CODE OF LAWS** was drawn up, chiefly by Roger Ludlow; which reduced the number of capital offences from 160 of England, to about 15.

In 1687, the independent spirit of the colony was shown by the quiet but determined resistance made to Andros, in his **ATTEMPT TO TAKE AWAY THE CHARTER** of 1682; when the lights being put out by arrangement, in the room where Andros and the authorities had the Charter and were discussing it, Capt. Wadsworth carried it off in the dark and hid it so effectually in the hollow of the Charter Oak, that it could not be found.

The charter was thus hid from October 31, 1687, to May 9, 1689. In October, 1693, Col. Fletcher came to Hartford to assume command over the Connecticut militia, and attempted to read his commission at the head of the train-band, but was foiled by Captain Wadsworth, who commanded the drums to beat, and told Fletcher that if interrupted again, he would make the sun shine through him in a moment.

**NOAH WEBSTER**, was born in Hartford in 1758. In 1783 he published the "Elementary Spelling Book." This was followed by his *Compendious Dictionary* in 1806, which was a mere prelude to his famous "Unabridged Dictionary." He died in 1843, aged 85 years.

The **FIRST PRINTING OFFICE** was set up here by Thomas Green, in 1764, who established the Connecticut Courant in October, 1764.

In 1775, a small committee of enterprising men met here and made those arrangements for raising men and money, which resulted in the **TAKING OF TICONDEROGA** by Ethan Allen "in the name of the Great Jehovah and the Continental Congress."

In 1784 the city was incorporated.

In 1790 a **WOOLEN MANUFACTORY** was started on Park river at foot of Gold street, then called Factory lane, but after trial by different parties was abandoned as a losing business.

In 1797—9, the **FIRST STEAM LOCOMOTIVE** ever made, was set running in Main st. by Dr. Kinsley; also, inventor of the brick-pressing machine. The "Mansion house" on Kinsley st. was built by him, with brick made by himself—probably the oldest *home*-pressed brick house in the United States. A few lines under the raised ground at its S. E. angle, is the inscription "A. KINSLEY. 1796."

Isaac Hanford of this city took out a patent for a new method of making **POTTERY WARE**, tile and brick, January 20th, 1800. The manufacture of pottery ware has continued from that year in Front street near Potter street, to the present time, and is still carried on there extensively. In the pottery building are three hewn white oak stanchions that were taken from the old 1719 State house, which were used there probably as joists in the main floor. Goodwin & Webster's old factory was on the corner of Front and Potter streets.

In 1811 Elihu White removed his Type Foundry from this city to New York city, to whom Farmer, Little & Co. are his last successors.

To a Hartford man, John I. Wells, was issued in 1819, the first patent for **LEVER PRINTING PRESSES**.

### OLD CHARTERS.

In 1792 the Hartford Bank and the Hartford Charitable Society were established. In 1810 the Hartford Fire Ins. Co., was organized, and the *Etna Insurance Co.*, in 1819. The American Deaf and Dumb Asylum—the first of its kind on this continent—was chartered in 1816; Trinity College in 1823; the Retreat for the Insane in 1824; the Historical Society in 1825, reorganized 1839; the Orphan Asylum in 1833; the Young Men's Institute, in 1839 succeeding the Hartford Library Company established before the Revolution and chartered in 1799, and the Young Men's Institute was re-chartered in 1878 as the Hartford Library Company; the Wadsworth Athenaeum in 1842; the Hartford Hospital in 1854; the Watkinson Library in 1854; and other charitable or educational and literary organizations, all of which have been liberally or exclusively aided by the citizens; see the pages of this work devoted to Corporations and Societies.

The **POST OFFICE** in this city was the first one established in this County, and was located on the corner of State and Market streets; afterwards it was removed to a building that stood next below the present residence of James B. Hosmer. When a Mr. Hildreth was Postmaster, previous to 1800, it was moved so often that once when Sheriff Williams drove up to the store to get his mail, upon being informed that Mr. H. had moved again down street, near the Little River, he petulantly responded, "Hildreth moves so often he will move again before I can get there." Its longer location was on the S. E. corner of Main and Grove streets;

from thence about 1827 it was removed to S. W. corner of Main and Asylum streets; in about four years it was removed to the building now known as 66 State street; from thence it was removed to the directly opposite side of the square, into the basement of the then Universalist church edifice, where it remained some ten years; from thence it was removed to the new building next door west, now known as 8 Central row; and from thence removed in 1854 to its present location, 252 Main street; from whence it will depart when the Government building on the east side of City Hall Square shall have been completed, which was begun in 1873.

On the 24th day of June, 1772, the **FIRST COACH** started for New York from Boston. It was to leave each terminus once a fortnight, and the proprietors promised a weekly stage "if encouraged in their great enterprise!" The fare was fourpence, York currency, per mile. It reached Hartford in 2 days, and New York in 2 more. Stage coaches first appeared in England in 1553, though some authorities make the claim for 1580.

In 30 years thereafter, from a Boston newspaper of 1802, the following announcement is taken:—"Boston and New York Mail Stage" starts from King's Inn, Market square, every day (Sundays excepted.) Summer establishment, leaves Boston at 10 a. m. and arrives at Worcester same day at 8 p. m.; leaves Worcester next morning at 3 o'clock, and arrives at Hartford same day at 8 p. m.; leaves Hartford next morning at 3 o'clock, and arrives at Stamford same day at 8 p. m.; leaves Stamford next morning at 3 o'clock, and reaches New York at noon same day. The time between Boston and Albany was also seventy-four hours. Now it is made in seven hours, which is also the express time between Boston and New York.

### STATE HOUSES OR CAPITOLS IN THIS CITY.

The first meetings of the Legislature were held in the old meeting house which stood on the east end of City Hall square, in the 2d story called the Court Chamber.

In 1719 a wooden structure of two stories was erected in front of where the one just vacated stands and now known as the City Hall, and was first occupied in May, 1720, which cost, with its furniture, £750.

The State House just vacated, standing in front of the new Post Office building—the first story of free-stone, the other two of brick, is a Doric edifice that was first passed upon by the Legislature in May, 1792—its erection commenced in 1794, first occupied in 1796, costing \$52,480, of which Hartford gave \$3,500 and the County, \$1,500. For engravings and full descriptions of all Conn. Capitols or State Houses, see pp. 256—259 of this copy of Geer's Hartford City Directory.

The present marble edifice was begun in 1873, and first occupied by the Legislature March 26th, 1878, but state offices were not moved thither until Oct. 26, 1878.

In the West Vestibule is the celebrated **ORIGINAL PAINTING OF WASHINGTON**, taken from life, by STUART.

In the State Library are the portraits of nearly all of the Governors of Connecticut, up to 1860.

In the Senate Chamber is the Governor's Chair, carved from Charter Oak wood.

The Colonial Legislature of Connecticut was without a Senate for the first sixty years after its settlement. From the union of the colonies of New Haven and Connecticut under the new charter in 1662, to 1701, all the sessions of the General Court or Legislature, were held in Hartford; but at the latter date, it was enacted that the October session should be held in New Haven, and this prevailed till the Constitution of 1818, was adopted when annual sessions were held the even years, as 1818, at New Haven and the odd years, as 1819, at Hartford. This remained unchanged till the amendment to our State Constitution was adopted in 1873, to take effect on and after 1st Wednesday in May, 1875, restoring Hartford as the sole capital. So it seems to be no new thing to have one capital, and that Hartford. And on and after January, 1877, it has met here annually, on the first Wednesday after the first Monday in Jan.

December 11th, 1844, Dr. Horace Wells of this city experimented upon himself, by procuring another den-

tist to extract one of his largest teeth, whilst himself was put under the influence of nitrous oxide gas. Thus he became the DISCOVERER of ANAESTHESIA, and he followed up the same in his practice till his decease.

THE MEAN ANNUAL TEMPERATURE OF HARTFORD as taken from the Smithsonian Institute tables, is 50°. Prominent places in the U. S. the nearest approach to same temperature are Springfield, Ill., 50°; Indianapolis, Ind., 51°; Des Moines, Iowa, 49°; Leavenworth, Kansas, 51°; Omaha, Nebraska, 49°; Santa Fe, New Mexico, 51°; Albany, N. Y., 49°; Nashville, Tenn., 50°; Stellacoon, Washington Territory, 51°.

The street formed by the DYKE around Col. Colt's improvement is 32.50 feet above the base line of the city, which corresponds with low watermark. It is 8,698 feet long, 30 to 50 feet wide at top, having cost \$80,745.35. This Dyke encloses 123 acres of land.

The Colt Artesian Well, began in the fall of 1868, and completed May 1, 1869, is 1554 feet in depth, and has cost about \$10,000 and discharges 50 gallons of water per minute. Located rear of Mrs. Colt's house.

REVIVAL or GOSPEL MEETINGS have been held in this city during the winter of 1877-8, with most extraordinary success. Preparatory daily meetings began in Dec. Messrs. Dwight L. Moody and Ira D. Sankey began their work at the Rink Jan. 6th, 1878, who were followed Feb. 10, by Rev. Geo. L. Pentecost and Mr. Geo. C. Stebbins until Mar. 19, 1878, evening. Meetings three times daily except Saturdays. This is the most remarkable of all the series of revival meetings in this City the past sixty years, in the attendance, length of continuance, &c., and has exceeded all former revivals from Elder Muffitt in the old State House in Church street, in 1819, down to the present time, under Reverends Asahel Nettleton, Lyman Beecher, C. G. Finney, Nathaniel Colver, Jacob Knapp and A. B. Earle.

#### HARTFORD BRIDGES.

The *Main Street Bridge* is of a single arch, on rock foundation and is 100 feet wide, 7 feet in thickness at the base, and 3 feet 2 inches at the center—the chord or span of it is 104 feet, and it is 30 feet 9 inches from the bed of the river to the top of the arch. Cost \$31,500. This bridge was completed in the fall of 1833—less than one year from the time it was begun, by Elias Rathbun, the contractor, under superintendence of Henry Hudson, Henry Kilbourn and James Dodd. At a Town meeting, Dec. 30, 1833, it was "Voted, That the thanks of this Town be presented to the Committee appointed to superintend the building of a Stone Bridge over Mill (now Park) River, for their skillful and faithful services, gratuitously received in constructing said Bridge, which combines strength with elegance of architecture, and is alike honorable to the Town, and to said Committee."

The *Ford Street Bridge* cost about \$15,000, and was built in the year 1850; is 35 feet wide, 174 feet long, of five free stone arches,—the north and south of fifteen feet span each—the other three of 18 feet each; width of arches 26 feet; width of piers 5½ feet; height from top of center arch to top of sides, 7 feet.

The *Albany Avenue Bridge*, built in the year 1850, cost about \$1,800.

The *Front Street Bridge* cost \$10,000, and was built in the year 1853; is 44 feet wide, 148 feet long,—of three free stone arches—two of 34 feet span, and one of 35 feet—all semi-circular, and divided or supported by two piers, each six feet wide.

The *Asylum Street Bridge*, junction Asylum st. and to west drive on Park; erected 1858, of wood, cost \$2,500.

The *Wells Street Bridge*, from 41 Wells street to east drive on the Park; erected of wood in 1858; cost \$2,500.

The *Park Street Bridge*, built in the year 1858, cost \$1,977.40.

The *Commerce Street Bridge*, a swing or draw-bridge, costing \$14,000, built fall of 1859. Town paid \$8,750.

The *Asylum Avenue Bridge*, built in the year 1860, cost \$1,924.05.

The *Flatbush Avenue Bridge*, built in the year 1862, cost \$1,974.

The *Trumbull Street Foot Bridge*, erected of iron in 1864, cost \$4,000, and is 75 feet long, 10 feet wide and 18 feet from bottom of river, of one span, and bears ten tons in the center.

The *Broad Street Iron Bridges*, of the Truesdell pattern, erected of iron in 1867, cost \$52,111.79—Railroad Companies paying \$7,550 thereof.

The *Farmington Avenue Bridge*, was built in 1871, of stone, across the North branch of Park river, cost \$27,901.54.

The *Capitol Avenue Bridge*, across Park river, connecting Capitol av., with Sigourney st., was built, in 1872, costing \$30,163.71.

The *Laurel Street Iron Bridge*, over the railroad tracks at Laurel street crossing, was erected in 1875, at an expense of \$17,357.21—of which the city paid \$9,215.13—the Railroad Companies the balance.

The *Flower Street Foot Bridge* connecting said street with Lawrence st., cost \$464.50 and was finished Dec. 21, 1878.

Thus it will be seen that Hartford has paid for constructing 16 Bridges, the sum of \$205,782.12.

#### THE HARTFORD BRIDGE COMPANY'S BRIDGE

Across the Connecticut river, built in 1809, is more than 1000 feet in length, and cost about \$125,000.

#### THE CHARTER OAK TREE,

In the trunk of which was concealed the Charter of Connecticut from Oct. 31, 1687, to May 9, 1689, was blown down in a severe storm, Aug. 20, 1856. It stood on lot No. 29 Charter Oak avenue. This Charter was won by Gov. John Winthrop to the colonists from Charles II., King of England, April 23d, 1662, and the unsuccessful attempt to wrest the same from the State was made by Sir Edmond Andros, Oct. 31, 1687. The original Charter is in the office of the Secretary of State, framed in wood from the tree that concealed it from the minions of James II. The mode of government established by this instrument was superseded on the adoption of our present constitution, in 1818. On the 23d day of April, 1862, this Charter was 200 years old.

A young thrifty Oak tree about 20 feet in height, from an acorn of this Charter Oak tree, is growing on Bushnell Park, in the triangular plot near the bank of the Park river, between the Trumbull st. and Mulberry st. bridges. Also another Oak tree from an acorn of the Charter Oak is on this Park near Elm st. at its junction with Clinton st.

#### BUSHNELL PARK

Was laid out in 1853, contains forty-six acres, including the fifteen acres purchased of Trinity College in 1872, and is bounded north by Asylum st., east and west by Park river, south by Elm st. and Capitol av. Total cost of land and construction not including the annual care thereof, \$946,070.06. Upon the most elevated portion the new State Capitol building is erected.

The Common Council of this city at a regular meeting held Feb. 14, 1876, only a few days previous to the decease (which occurred on Feb. 17), of the late Rev. HORACE BUSHNELL, D. D., unanimously passed, and on the same evening, officially sent to him sundry resolutions concerning the park laid out by the city in 1854, which owes its origin and successful execution in a large degree to his foresight, to his able and earnest advocacy, and to his influence, freely and with generous persistence exerted in public, in private and through the press, and in recognition of his invaluable services thereon, they *Resolved*, That the public park now commonly called "The Park," be and hereby is named "BUSHNELL PARK."

In the year 1869 a Statue to the memory of Rt. Rev. THOMAS C. BROWNELL, Bishop of the Protestant Episcopal Churches of Connecticut, was erected on this Park.

June 17th, 1874, a Bronze Statue 8 feet in height, of Gen. ISRAEL PUTNAM, weighing 1,200 lbs. was erected on this Park which with the pedestal of Quincy granite cost \$14,000.

July 22d, 1875, a Bronze Statue of Dr. HORACE WELLS, the discoverer of Anesthesia, was erected on this Park at a cost of \$10,000—one half paid by this State and the other half by the city of Hartford.

#### SOUTH PARK.

At the junction of Main, Park, Jefferson and Wyllys streets, with Wethersfield and Franklin avs.

#### WASHINGTON,—LAFAYETTE STREET PARK.

At the junction of Washington, Buckingham and Lafayette streets.

#### NORTH PARK.

At a special city meeting held in October, 1875, the Court of Common Council were authorized to lay out at public expense, a park between Avon, Front, North and Windsor streets,—not begun, July, 1879.

#### FRANKLIN AVENUE PARK.

At junction of Franklin and Maple avenues. Laid out in 1876.

The expenses of general care of the several Parks the past year ending April 1, 1879, were \$5,988.09.

#### THE NAVIGATION OF CONN. RIVER TO THIS CITY,

Is by a daily line of Steamers to New York city, and a daily steamer to all landings between this city and Long Island Sound, and a steamer three times a week to river landings, New London and Sag Harbor, the latter only from June to November.

STEAMBOAT navigation of Connecticut was begun by the steamboat Experiment, in 1820. From New York to New Haven by the steamboat Fulton, March 21, 1815.

In the winter of 1710, 1711, the Connecticut river was not frozen over below Hartford, and for several miles above this city.

Jan. 29, 1838, the steamboat Clifton arrived from and left for New York—the Connecticut river being free from ice.

There was navigation for steamboats on Conn. river from Jan. 8, 1870, to Feb. 4, 1870,—the steamer Silver Star made several daily trips between this city and Essex.

The steam tug boats on Connecticut river, frozen in by the unexpected closing of river navigation, brought up their several tows, on the opening of the river, Dec. 5 till Dec. 24, when it again closed—and twice subsequently navigation was opened and closed before it was opened to spring navigation, in 1875.

The Steamer Silver Star continued her daily trips between Hartford and all Connecticut river landings in winter of 1877 until the 1st day of January, 1878, when she could come up no farther than Portland, 37 miles up from Saybrook, and 21 below Hartford.

#### A PUBLIC BATHING HOUSE,

Was located off the foot of Ferry street, in the Connecticut river, being completed July 20, 1873, at an expense of \$4,101.34; and \$340 running expenses. There were 23,450 persons enjoyed its privileges during the seven weeks then left of that bathing season.

In the four bathing months of 1874 there were 16,839 baths. The expenses for the year to the city were \$1,156.24. In 1875 there were 28,974 bathers, and the expenses were \$1,426.21;—\$776.84 were for repairing it after being wrecked. In 1876 the bath house was placed in position off Dutch point at an expense of \$865.95 for the season opening July 13th, and closing October 1st. There were 21,500 bathers. This bath house was reopened to the public in 1877, early in June till about October 1st, and was constantly in use; the entire expenses this year were \$621.58. It was reopened in 1878 and the expense thereof was for that year \$407.71. Hours for bathing, from 5 A. M. to 9 P. M. After 6 P. M. boys under 15 years of age are not admitted. On Sundays from 5 to 12 A. M.

#### STREETS.

There are about 80 miles of streets in this city under 274 different names. The expenses of the street department have been—in 1876, \$101,132.63; in 1877, \$68,908.50; in 1878, \$53,242.01.

#### LAMPS, GAS, ETC.

There are 60 miles of Gas Pipes laid in the streets of this city. The third and last gas holder that the Gas Company have just built will contain 300,000 cubic feet

of gas, and it cost \$55,000. See list of street marked G, pages 17 to 24 for those having Gas Pipes laid therein.

There are 1,233 public Gas lamps, and 114 Fluid lamps maintained in the streets of this city. The total cost during the past year was \$37,421.94, being \$17.16 more than during the preceding year.

#### SEWERS

Have been constructed in most of the streets of this city. See letter s. to such streets as have been sewer-ed, in list of Streets and Avenues, pp. 17 to 24. The most extensive and expensive one is the Franklin avenue sewer, finished in 1873 and costing \$150,000.

#### RAID ON DOGS.

Owing to a few cases of hydrophobia in and near this city in 1876-7, there has been 1,300 Dogs killed in this city, by authority of law, from June 1, 1877 to June 1, 1878. Up to June 1, 1878, under the new law, there have been 888 Dogs licensed.

#### THE OLDEST MALE RESIDENT

In Hartford, June 1, 1878, is Asaph Willard, 914 Asylum st., who, if living Christmas eve, 1879, will be 53 years of age. For 53 years, prior to his eye sight failing in 1870, he carried on engraving and plate printing in this city.

The SCHOOL DISTRICT TAXES in this City range from ¼ to 4 mills, averaging a trifle less than 2 mills.

The reduction of the Hartford City debt for year ending April 1, 1877, was between \$97,000 and \$98,000 and the rate of taxation was reduced from 1872 rate, 5 mills.

The reduction of the Hartford City Debt for year ending April 1, 1878, was \$100,401.86 on a rate of taxation which was reduced from 1872 rate, 5 mills.

The Hartford City Debt was slightly reduced for year ending April 1, 1879, on a reduced levy and on a rate of taxation which was reduced from 1872 rate, 7 mills.

From the above table it will be seen that for seven years past, with a single exception, the rate of taxation has been reduced annually and the debt also reduced. See Treasurer's Reports, pages 269 and 279.

#### HARTFORD UNION PASSENGER RAILROAD STATION, 466—478 ASYLUM ST.

THE building erected by the New York, New Haven and Hartford, and the Hartford, Providence and Fishkill Railroad Companies, is built of Portland stone, of the Italian Campanile style of Architecture, at an expense of \$60,000. Its entire length from North to South is 360 feet. The front faces to the South on Asylum street, and is 94 feet in width; the corner towers thereto are 23 feet square and 76 feet in height; the smaller towers on the South are 8 feet square and 54 feet in height; the center over the arch is 32 ft. wide on elevation of 42 ft.; the span of the arches being 25 ft. 5 in.; and the height of the arches from the track, 20 feet. The second and third stories of the front portion of the building are finished off into offices for the use of several officers for these respective companies. The center of the first stories on both sides is handsomely fitted up into Passenger Saloons. The passenger saloons and the platforms on the outside of the building have been enlarged; the saloons made into one large waiting room 276 feet in length, with refreshment counter in center; closets in each end, for the better accommodation of the public; the building is heated by steam. The east platform is 600 feet long, extending from Asylum to Church sts., also 100 ft. wide from Asylum st. to the depot; the whole is covered with a veranda. Cost of improvements, \$32,000.

## Hartford Water Works.

For Commissioners, see page 278.

EDWARD J. MURPHY, Superintendent.

J. Seymour Chase, Sec'y. | Wm. Worthen, Cong Eng.  
Albert A. Fox, Inspector. | H. W. Ayres, Ass't Eng'r.  
Wm. Russell, Bookkeeper. | Thos. Oakes, Service Pipe.  
B. Dwyer, Street Mains. | F. A. Brooks, Pump Works.

These works were first started with steam in a brick edifice occupied for the engine, boilers and pumps for the Water Works, and were used for twelve years in supplying this city with water from Connecticut River, and which are now kept ready for use in case of any failure of supply from Trout Brook, from bursting of mains, drought, etc.

The Office of the Commissioners is 3 Pratt st. The Pumps, &c. 2 Water st. Surveys were commenced Oct. 1853, ground broke June, 1854, and first pumping of water Oct. 23d, 1855. The pier in the river, to protect the receiving pipe, is where at low water, there is 12 feet in depth, the water running into a well 140 feet from the river; from thence it is pumped 9 feet.

The MACHINERY used for pumping, up to Jan. 2d, 1867, 2 P. M., (at which time water from West Hartford was substituted,) is four double pumps so actuated by cams as to produce a constant flow of water.

A highly finished Condensing Beam Engine supplies the power, and between it and the pumps, gearing is introduced, by means of which they are driven at a speed much less than that at which the engine runs. The machinery is noiseless in its operation while delivering one million gallons of water in twelve hours at the reservoir, which is at an elevation of 125 feet above the river, and one and one-third miles distant from it, and it is satisfactory to know that this result of native enterprise is producing economic results better than those of any other pumping machine in the country. The load upon the engine at low water, and with a full Reservoir, is 11,934 pounds.

THE ORIGINAL GARDEN STREET RESERVOIR is located on Garden street, at the head of Myrtle, and is connected by 6,879 feet of 16 inch iron pipe, with the Pumps on Water street. The banks are thirty-two feet in height, designed to be filled to the height of thirty feet, which is one hundred and twenty-five feet above low water mark at the river, and will hold eight millions six hundred thousand gallons. When the Reservoirs are filled to their maximum height, the head at various points is as follows:—

THE WEST HARTFORD RESERVOIR was completed and water furnished the city therefrom at 2 o'clock P. M., January 2d, 1867, at which time the pumps ceased working, and have been used since only occasionally.

The Water Rents collected for the year ending March 1, 1879, amounted to \$116,939.68, with \$354.04 on bills remaining unpaid, and shows an increase over the preceding year of \$38.40; salaries and current expenses, \$30,186.52; interest paid on Water Bonds, \$63,120.00—total current expenses \$93,306.52.

Total consumption of water for the year ending March 1, 1869, when it was all measured at the pumping works, was 700,000,000 gallons. Under the direct distribution from the West Hartford reservoir during the 1876 fiscal year, was 1,808,500,000 gallons, equal to 4,954,795 gallons per day.

Reservoir No. 1 is five miles from City Hall, and at high water flows 32 acres. Its capacity of 35 feet in depth is 156,599,802 United States gallons. The altitude of the reservoir at top water above low water of Connecticut River is 260 feet, and gives a head at the City Hall of 135 feet over the old works.

Reservoir No. 2, located in towns of West Hartford, New Britain and Farmington, is now (June, 1879,) being constructed, and when finished this fall, will add 600,000,000 of gallons to our water storage supply. Thus making in the four Reservoirs, when full, a supply of 1,208,450,367 gallons.

Reservoir No. 3 is 1½ miles beyond Reservoir No. 1, covering a water surface of 49 acres with 42 feet depth and capacity of 297,325,736 gallons.

Reservoir No. 4, is located about one mile north-west-erly from Reservoir No. 1, and was completed October 30, 1875, with a capacity, when filled to depth of 37 feet, of 154,524,829 gallons, covering 25 42-100 acres at top water line. Total cost \$59,117.78.

Fifty-two new service pipes were added last year, making a total now of 4,823 service pipes.

Total amount of main pipe now (April, 1879,) in use is 70 miles and 353 feet.

There are 52 water meters in use.

The total outlay during twenty-three years, since this water system has been introduced, has been \$1,408,935. of this amount \$356,935 has been paid by the city and water department, and bonds to the amount of \$1,052,000 have been issued to pay the remainder, which constitutes more than one-half of the net debt of this City. Besides, the water department have now enough earnings on hand to pay for the construction of the new reservoir which will double the storage capacity of the works.

## KEYS CAN ALSO BE FOUND WITH

Fire Commissioners—Thos. J. Blake, John R. Hills, George B. Fisher, Charles S. Davidson, Leander Hall, Edwin J. Smith.  
 Chief Engineer—Henry J. Eaton. Asst. Engineers—Leander H. Jaycox, Louis Krug, Joseph Kincaid.  
 Police Force—Each member. Superintendent of Fire Alarm Telegraph and Assistant.  
 Also, Mayor George G. Sumner.  
 These boxes are of iron and double, containing an inner box, inaccessible to any one except the superintendent or persons in charge of the telegraph. The inner box contains the electrical apparatus, necessary for giving the alarm. The outer box can be opened by a key in charge of some responsible person living near by, and a person discovering a fire will obtain this key, unlock the box, and give the alarm, which is done by simply pulling a slide. Each box is numbered, and a single pull of the slide strikes the number of the box four times on the alarm bell in the signal tower, and also on the gongs in the various engine houses.

## FIRST CHURCH EDIFICE ERECTED IN HARTFORD, BY 1ST CONGREGATIONAL SOCIETY.

The location of the first church edifice, now known as the First Congregational or Center Church, has not been accurately ascertained. It was nearly upon the eastern end of City Hall Square; and the burying ground was bounded east and south by Market street and State street. It was a square building, probably framed, and with a thatched roof. In 1640 it had a bell. In 1649 the old church was given by the town to Mrs. Hooker, and a new one built.

## READ THE FOLLOWING ABOUT SQUATTER

### Joint Stock Corporations,

That have filed their Certificates of Organization in the  
Town Records of Hartford.

During the past twelve months to June 1, 1879, there have  
been seventy-six Joint Stock Company formations filed in the  
Hartford Town Clerk's Office, neither of which Companies have  
any office in this city, that we can find, and the names of the  
stockholders are not found by our canvassers, as being residents  
here. This class of Corporations that have no office or sign in  
this city, neither carry on any business, or pay any taxes in  
this State, but are doing or pretending to do business in other  
States under the Joint Stock Laws of the State of Connecticut,  
by having squatted here with their certificates of formation,  
which some call wild-cat Corporations, we omit, for we intend  
to give a list of only the Corporations doing their business in  
this city. These Companies have an aggregate capital on  
paper of \$43,898,300, ranging from \$10,000 to \$5,000,000 to  
each Company.

In one year to June, 1878, there were thirty-three of these  
squatters with an aggregate capital on paper of \$21,203,000,  
ranging from \$30,000 to \$5,000,000 to each Company.

In one year to June, 1877, there were twenty-three of these  
squatters with an aggregate capital on paper of \$22,250,000,  
ranging from \$25,000 to \$4,000,000 to each Company.

In one year to June, 1876, there were thirty-three returns  
in this city, from new Corporation squatters from out of this  
State, giving their aggregate capital as \$15,835,000.

And during the four years, preceding June 1st, 1879, there  
have been 165 such formations of Companies filed in Hartford,  
representing their aggregate capital at \$103,136,500.00.

Our canvassers have found that three of the above named  
Companies have roosting places in the office of W. Eddy.

## Corporations.

In order to facilitate the finding of any particular Corpora-  
tion, we have arranged them in alphabetical order, and have  
omitted the usual prefix to each one, of the word "THE."

## Necrology of Hartford;

## OF ALL PERSONS 21 YEARS OF AGE AND UPWARDS;

Prepared from Official Records, for GEER'S HARTFORD CITY DIRECTORY, for the past current Directory year from June 1st, 1878, to June 1st, 1879.

The months of June, July, August, September, October, November and December are in the year 1878. The months of January, February, March, April and May are in the year 1879.

During these past 12 months there have been 734 deaths in Hartford, 190 being under 21 years of age, and 544 of 21 years to 97 years. The united ages of these 544 persons—21,507 years—average nearly 40 years to each. The largest number of deaths in either month was 89 in July—the least number was 35 in May.

SECOND CLASS MAIL MATTER.

Registered Newspapers and Periodicals, issued at stated intervals, as frequently as four times a year, including sample copies from an office of publication, without substantial binding, ..... 2 cts. a lb.

THIRD CLASS MAIL MATTER

Includes books (of any weight, if single), transient newspapers, and periodicals, circulars, and other matter wholly in print (not included in second class), proof sheets, corrected proof sheets, and manuscript copy accompanying the same, postage shall be paid at the rate of ONE CENT for each TWO OUNCES or fractional part thereof, and shall fully be prepaid by postage-stamps affixed to said matter. "Printed matter" is the reproduction upon paper, by any process except that of handwriting, of any words, letters, characters, figures, or images, or of any combination thereof. Upon matter of the third and fourth class, or upon the wrapper inclosing the same, the sender may write his own name or address thereon, with the word "from" above and preceding the same, and in either case may make simple marks intended to designate a word or passage of the text to which it is desired to call attention. There may be placed upon the cover or blank leaves of any book or of any printed matter of the third class a simple manuscript dedication or inscription that does not partake of the nature of a personal correspondence. Also all commercial papers partly printed, such as papers of legal procedure, deeds of all kinds, way bills or bills of lading, invoices, and the various documents of insurance companies, circulars, handbills, etc.

FOURTH CLASS MAIL MATTER.

Mailable matter of the fourth class embraces all matter not embraced in the first, second, or third class, which is not in its form or nature liable to destroy, deface, or otherwise damage the contents of the mail-bag, or harm the person of any one engaged in the postal service, and is not above the weight provided by law, which is hereby declared to be not exceeding four pounds, for each package thereof, except for books and documents published or circulated by order of Congress, or official matter emanating from any of the departments of the government. All matter of the fourth class is subject to examination and to a postage charge at the rate of ONE CENT AN OUNCE or fraction thereof, to be prepaid by stamps affixed.

PRE-PAYMENT by stamps is required for all postage on all domestic Letters and transient printed matter.

Letter postage will be charged on all matter to which no specific rate of postage is assigned.

Prepaid and free letters and postal cards shall be forwarded from one post office to another without additional charge for postage; but letters having been delivered according to their address, require postage, at prepaid rates, when returned to the office for remailing.

GERMANY.—The new German Empire has adopted a new and uniform system of gold coinage, thus withdrawing the coins of the various States composing that Empire, and the substitution of the new coin as follows: A pound of fine gold is divided into 139½ pieces, the one tenth part of this gold coin is called a "Mark," and is subdivided into 100 Pennies (Pfennige).

ITALY.—A similar law has been applied to the consolidated Italian States.

ESTABLISHED, 1838.
